23/1000 unique parts

Build complex bills of materials from prints through AI BOM Table extraction, saving you hours of manual setup.

Improve Quoting in Your Shop with Paperless Parts

Workflow Management & Centralization

Keep all files, parts, and job knowledge in a single, secure place to get accurate, consistent quotes out the door faster.

Costing & Pricing Automation

Our patented geometry-driven technology helps you estimate costs quickly and apply shop-specific pricing with automated rules.

Enhanced Buyers' Experience

Having a professional, modern presence and being easy to do business with makes it easier to build brand loyalty across your customer base. Plus, we support ITAR and CMMC compliance, as well as AS9100 and ISO9001 standards.

Integration into Your Tech Investments

Paperless Parts' API allows you to integrate seamlessly with other critical systems in your shop, including your ERP system, CRM, accounting software, and more.

Drive Real Results

Manufacturers specializing in machining, sheet metal fabrication, additive, rubber manufacturing, and more see tangible results.

Greater Resource Efficiency

"I've been able to focus on other areas of the business. Before, that wouldn't have been possible without hiring another estimator."

Glen Langford, Director
Metal-Tech Industries

Increased Revenue & Profitability

"We feel busier. We've had quite a bit of backlog, and we're on track to hit end-of-year numbers that are 20-30% higher than last year's."

Stephen Baillie, President
Baillie Fabricating & Welding

Consistency & Standardization

"We've tailored Paperless Parts to reflect how we price work, while keeping every file, note, conversation, and decision behind a quote in one place. Anyone on our team can go back and quickly understand how a quote was developed and why, which helps us work more consistently and share knowledge across the business."

Ryan Hammer, Sales Engineer
Pindel Global Precision

Process Optimization

"Paperless Parts gave us a clear, consistent process across sales and estimating and the data to understand why we win or lose opportunities. That visibility empowers our entire team—from estimating to planning to plant management—to validate margins, adjust workflows, and plan smarter based on real shop floor feedback."

Blake McKenzie, Business Accounts Manager
Special Products & Mfg.

Reduced Risk

"Paperless Parts helps us identify potential problem areas early, before they become costly mistakes. It saves our team time, money, and frustration while protecting customer relationships."

Shawn Cerne, Business Development
Acutec Precision Aerospace
