

Improve Win Rates and Go from Quote to Order Faster With Paperless Parts and JobBOSS²

“With the Paperless Parts/JobBOSS integration, our ability to go from RFQ, to Quote, to Order, to Job has improved significantly as the hand-off of responsibilities is seamless.

As a result, we have been able to keep pace with our record best bookings over the last 6 months, the amount of time needed to train a new employee in quoting has been reduced in half, and the communication with our customers has never been better. Using the integration, we believe we can handle 15% growth in FY2023.

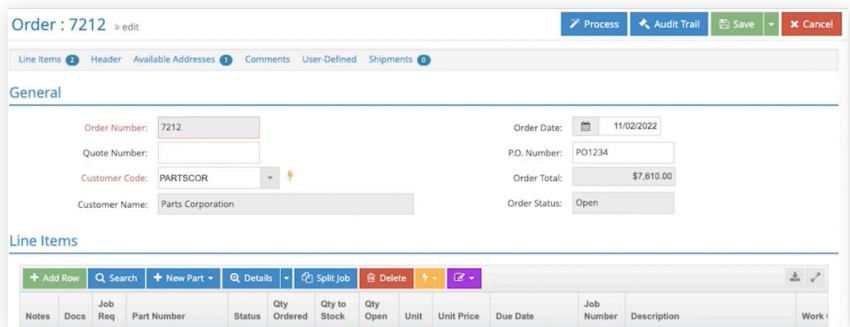

Christian Cortez, Head of Engineering

Nobody likes double data entry.

JobBOSS² users can save time, turn quotes around faster, and reduce manual data entry when they integrate their ERP with the #1 Quoting and Estimating platform for job shops. With two-way import/export functionality between Paperless Parts and your ERP, you can:

- ✓ **Quote faster by automatically importing critical information** from JobBOSS² into Paperless Parts such as customer lists, raw material pricing, work center rates, outside services, and more.
- ✓ Once an order is won, **reduce human error and prevent costly mistakes** by automatically exporting all relevant information, including bill of materials and routing information, from Paperless Parts into your ERP.
- ✓ **As strategic partners**, ECI and Paperless Parts have committed to future-proofing the integration between their supported platforms. As we innovate together, our customers reap the benefits.

The Most Powerful and Flexible Quoting Solution

Centralized Quote Management

Never miss an opportunity with complete visibility into your quotes.

ITAR & CMMC Compliance

Provide the utmost level of security for you & your customers' data through our ITAR registered & CMMC compliant platform.

Advanced Analytics

Analyze multiple layers of data to prioritize quotes, price smarter and boost profit margins.

Digital Quotes & Payments

Win more business with a seamless customer checkout experience.

Automatic BOM Generation

Easily manipulate bill of material structures to save hundreds of clicks in your ERP.

Geometric File Interrogation

Detect 62+ different geometric attributes in a 3D CAD model to better inform your pricing formulas.

2D & 3D CAD File Viewer

View PDFs & 3D CAD files without native CAD software.

DFM Warnings

With automatic Design for Manufacturability (DFM) warnings, you'll catch mistakes before they cost you.

Bi-Directional Integration with Your ERP

Eliminate the guesswork with live sync statuses & import/export progress between Paperless Parts & your ERP.

Multi-Component Nesting

Unfold and nest multiple part files on the same sheets to quickly calculate optimized material & labor costs.

Collaboration and Workflows

Securely communicate questions & action items with employees, vendors & customers.

Product Manufacturing Information (PMI) on Model-Based Definition Files

Extract & display PMI directly in your browser.
