

# Accelerate Revenue and Say Goodbye to Quoting Headaches with Paperless Parts

Sheet metal fabricators across the U.S. partner with Paperless Parts to streamline the quoting process, reduce mistakes, and operate more efficiently.

**More quotes = more revenue.  
It's that simple.**

**“We realized growth was happening in the shop, but our office functions couldn’t keep up.**

Now with Paperless Parts, it’s easier for our estimation engineers to program, model, quote, and nest projects. It’s all one cohesive process that’s much faster.”

**Zach Fennell**  
COO

**AMERITEX**  
MACHINE & FABRICATION

**Sheet metal fabrication is complex work.  
Your quoting process shouldn’t be.**

## Quote 10x More Efficiently

Quoting out of spreadsheets or ERP systems can require time-consuming BOM creation and manual data entry, and using multiple CAD and file viewing applications to view quote packages makes it easy to get lost.

Paperless Parts builds your BOM for quoting automatically from models, and our best-in-class file and model viewer lets you view all your files from one place.

## Nest Parts Right From Your Quote

With higher material and labor costs, nesting sheet metal parts is critical to competitive quoting.

Paperless Parts unfolds sheet metal parts from models and allows you to nest to optimize your material and labor costs, right from your quote.

## Never Miss Critical Information

Details of parts are often spread between various files and emails, making it easy to miss a critical detail that could cost your shop.

Paperless Parts allows you to view all of your files in one place, and our file viewer intelligently identifies features in models and calls out critical manufacturability warnings.

## Get Instant Hardware Pricing & Availability

Hardware availability and pricing directly impacts your ability to deliver parts on schedule.

Paperless Parts integrates with PennEngineering® to instantly identify PEM hardware in models and retrieves live pricing and availability from DB Roberts and availability from 10 other distributors.

## Do More With Less

### With Our All-In-One Sheet Metal Estimating Software.

#### ✓ Estimate Your Way and Train New Estimators

We work with your shop to build costing configuration that matches your estimation strategies, so your team can estimate consistently and rapidly train junior estimators.

#### ✓ All-in-One File Viewer

View 3D files with a best-in-class model viewer with BOM breakouts, measurement tools, feature callouts, and MBD support; alongside 100+ file formats including prints, documents, spreadsheets, and more.

#### ✓ Integrate Directly With Your ERP System

Paperless Parts connects with 10+ leading ERP systems to bring in your accounts and contacts and send over jobs you win for ordering and manufacturing planning.

#### ✓ PennEngineering Partnership

Get live pricing and availability of PEM fasteners from DB Roberts and 10 other distributors through our free PEMConnect™ tool.

#### ✓ Advanced Analytics

Analyze your shop's quoting activity to prioritize quotes and make informed decisions about your estimating practices.

#### ✓ Multi-Component Sheet Metal Nesting

Unfold and nest multiple 3D models and flat DXF/DWG files on the same sheets to quickly calculate optimized material and labor costs, right from your quote.

#### ✓ Intelligent Manufacturability Warnings

Paperless Parts analyzes models and identifies manufacturability issues that would require higher quoted costs or be impossible to manufacture.

#### ✓ ITAR Compliance & Secure File Sharing

Paperless Parts is fully ITAR compliant, and our file sharing tools let you redact details from PDFs and securely share prints and models with outside vendors.

#### ✓ Geometry-Driven Costing Engine

Paperless Parts detects 60+ attributes from models and automatically connects them to your costing formulas to quickly arrive at estimated costs and allows you to manipulate every variable to control the final price.

### Built For Manufacturers, By Manufacturers

Paperless Parts didn't start in a garage; we started in a job shop. Manufacturing is in our DNA, which is why we're the #1 quoting and estimating software in manufacturing.

Want to see why hundreds of sheet metal fabrication shops choose Paperless Parts? Get in touch with our team today.
